DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species III in the reply filed on 11/7/2005 is acknowledged.
2. Claims 2-3, 5-9, and 11-3 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/7/2005.

Specification

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claims 1, 4, and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "softer" in claim 1 is a relative term which renders the claim indefinite. The term "softer" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would

not be reasonably apprised of the scope of the invention. The examiner believes that "softer" relates to the flexural elastic modulus of the material and the Izod impact strength, but from the experiment table on page 26 of the specification there is confusion to the meaning of "softer" in the relationship of the materials. The table refers to the Izod impact strength being much greater in the backing member, which is to be softer, than in the instrument panel, which is to be harder, and the examiner believes the results are the opposite of the known reasoning of the Izod impact notch test.

Claim 10 is unclear. In line 3, the claim 10 states "the surface direction." "The surface direction" lacks antecedent basis, but also is unclear to which surface is the direction of alignment.

Allowable Subject Matter

6. Claims 1-13 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

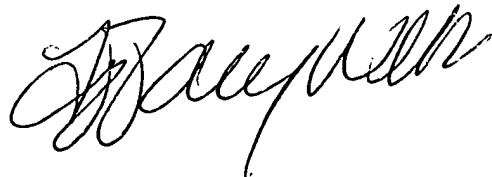

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following are air bag structures: Kuriyama et al. (US 5,335,939), Totani et al.
